SAFETY DATA SHEET

Rhodamine 110, (80 uM) (R110) (component of EarlyTox™ Caspase-3/7 R110 Assay Kits)

Section 1. Identification : Rhodamine 110, (80 uM) (R110) **Product identifier** (component of EarlyTox™ Caspase-3/7 R110 Assay Kits) : Not available. Other means of identification : Liquid. **Product type** : **R**8347D **Product part number** : EarlyTox™ Caspase-3/7 R110 Assay Bulk Kit Kit name EarlyTox™ Caspase-3/7 R110 Assay Explorer Kit : **R**8347/R8346 Kit part number Relevant identified uses of the substance or mixture and uses advised against **Product use** : For R&D use only. Area of application : Industrial applications. Manufacturer : MOLECULAR DEVICES, LLC 3860 N First Street San Jose, CA 95134 USA e-mail address of person : msdsinguiry@moldev.com responsible for this SDS **Emergency telephone** : CHEMTREC (24 hours): 1-800-424-9300 (USA/Canada), number (with hours of +1 703-527-3887 (Outside USA/Canada) operation) Section 2. Hazard identification

Classification of the : Not classified. substance or mixture

| GHS label elements | |
|--------------------------|---|
| Signal word | : No signal word. |
| Hazard statements | : No known significant effects or critical hazards. |
| Precautionary statements | |
| Prevention | : Not applicable. |
| Response | : Not applicable. |
| Storage | : Not applicable. |
| Disposal | : Not applicable. |
| | |

Date of issue/Date of revision

Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

Other means of identification

: Not available.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

Section 4. First-aid measures

Description of necessary first aid measures

| Eye contact | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. |
|--------------|--|
| Inhalation | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. |
| Skin contact | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. |
| Ingestion | : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |

Most important symptoms/effects, acute and delayed

| Potential acute healt | <u>h effects</u> | |
|-----------------------|---|--|
| Eye contact | : No known significant effects or critical hazards. | |
| Inhalation | : No known significant effects or critical hazards. | |
| Skin contact | : No known significant effects or critical hazards. | |
| Ingestion | : No known significant effects or critical hazards. | |
| Over-exposure signs | s/symptoms | |
| Eye contact | : No specific data. | |
| Inhalation | : No specific data. | |
| Skin contact | : No specific data. | |
| Ingestion | : No specific data. | |
| | | |

Indication of immediate medical attention and special treatment needed, if necessary

| Notes to physician | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
|----------------------------|---|
| Specific treatments | : No specific treatment. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. |

See toxicological information (Section 11)

Section 5. Fire-fighting measures

| Extinguishing media | |
|--|---|
| Suitable extinguishing media | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : Do not use water jet. |
| Specific hazards arising from the chemical | : In a fire or if heated, a pressure increase will occur and the container may burst. |
| Hazardous thermal decomposition products | : Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate person protective equipment. | |
|--------------------------------|--|------|
| For emergency responders | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". | |
| Environmental precautions | Avoid dispersal of spilled material and runoff and contact with soil, waterways, dr and sewers. Inform the relevant authorities if the product has caused environme pollution (sewers, waterways, soil or air). | |
| Methods and materials for co | inment and cleaning up | |
| Small spill | Stop leak if without risk. Move containers from spill area. Dilute with water and r up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. | nop |
| Large spill | Stop leak if without risk. Move containers from spill area. Prevent entry into sew water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earnd place in container for disposal according to local regulations (see Section 13 Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. | arth |

| Date of issue/Date of revision | : 10/05/2021 | Date of previous issue | : 25/01/2018 | Version : 2 | 3/9 |
|--------------------------------|--------------|------------------------|--------------|-------------|-----|
| | | | | | |

Section 7. Handling and storage

Precautions for safe handling

Canada

| Protective measures Advice on general occupational hygiene | Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
|--|--|
| Conditions for safe storage, including any incompatibilities | : Do not store below the following temperature: 4°C (39.2°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

Section 8. Exposure controls/personal protection

| Control parameters | | |
|----------------------------------|-----------|---|
| Occupational exposure limit | s | |
| None. | | |
| Appropriate engineering controls | : | Good general ventilation should be sufficient to control worker exposure to airborne contaminants. |
| Environmental exposure controls | : | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |
| Individual protection measure | <u>es</u> | |
| Hygiene measures | : | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Eye/face protection | : | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. |
| Skin protection | | |
| Hand protection | : | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. |
| Body protection | : | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Date of issue/Date of revision | | : 10/05/2021 Date of previous issue : 25/01/2018 Version : 2 4/9 |

Section 8. Exposure controls/personal protection

| Other skin protection | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
|------------------------|--|
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. |

Section 10. Stability and reactivity

: 10/05/2021

| Reactivity | 1 | No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|---|---|
| Chemical stability | : | The product is stable. |
| Possibility of hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerization will not occur. |
| Conditions to avoid | : | ₭eep away from heat, sparks and flame. |

Date of previous issue

: 25/01/2018

Version : 2

5/9

Date of issue/Date of revision

Section 10. Stability and reactivity

| Incompatible materials | : | Reactive or incompatible with the following materials: oxidizing materials, reducing materials and moisture. |
|----------------------------------|---|--|
| Hazardous decomposition products | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

Section 12. Ecological information

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

| | TDG Classification | DOT Classification | IMDG | ΙΑΤΑ |
|-------------------------------|--------------------|--------------------|----------------|----------------|
| UN number | Not regulated. | Not regulated. | Not regulated. | Not regulated. |
