Frequently **A**sked **Q**uestions Overview

The purpose of this FAQ guide is to step the user through the process of loading images into a stack (.stk) file both in the **Review Plate Data** dialog as well as from individual images saved on a drive.

A stack (.stk) file can then be used to:

- Create a montage from multiple sites within a well
- Create a color overlay
- Make a movie of Timelapse or Z Series images
- Apply a stack arithmetic algorithm to produce a projection image (i.e. maximum projection, best focus, etc.)

Loading Images from Review Plate Data

- 1. Open Review Plata Data
 - In the main toolbar click on

- Under the Screening menu, select Review Plate Data
- 2. Click on the Select Plate button
- 3. Browse through the folders to open the plate of interest

Loading Images from Review Plate Data

- 4. Change the Data View to
 - Well arrangement: to create a stack of sites from one well
 - Time point vs Well: to create a stack of time points from one site/well
 - **Z Steps vs Well**: to create a stack of Z steps from one site/well
- 5. Sites Section:
 - To montage multiple sites, enable All Sites
 - To work with Time lapse or Z Series images, disable **All Sites** and click on a site of interest
- 6. Right-click on the well of interest within the plate grid or image montage (wells are highlighted in green)

NOTE Only select (right-click) on one well. Selecting multiple wells will cause all images to be loaded in one stack for each wavelength

Loading Images from Review Plate Data

- Click on the Load Selected Images button to load images into a stack (.stk) file for each wavelength. These stacks will be named "Selected" plus the name of the selected channel(s).
- 8. Refer to corresponding chapters for montaging, making a movie, color overlays, or creating a projection image

Working With and Saving Image Stacks (.stk)

Image stacks feature controls that allow you to navigate through the series of loaded images.

- Play button: play the stack continuously like a movie.
- Advance buttons: advance one frame per click or play through the frames in the indicated direction
- Stop button: stop a play action
- Scroll bar: click and drag this bar to advance manually at your own rate through the stack

To save the .stk file:

 In the main menu, select File > Save As Navigate to the final location, name the file, and save as a Metamorph Stack File Format (*.stk)

OR

 Right-click in the stack window, select Save As, navigate to the final location, name the file, and save as a Metamorph Stack File Format (*.stk)

Save as type:

Metamorph Stack File Format(*.stk)

Loading Individual Images into a Stack File

- 1. Open the images
 - In the main menu, select File > Open. Navigate to the location of the image files of interest

OR

 In Windows, highlight the images of interest and drag-and-drop the icons onto the MetaXpress window

File	Edit Control Measure Screening	Window Help
	New	Ctrl+N
	Open	Ctrl+0
	Open in 4D Viewer	h
	Close	Ctrl+W
	Close All Images	
	Save	Ctrl+S
	Save As	Ctrl+Shift+S
	Save Partial As	
	Revert to Saved	
	Setup Sequential File Names	
	Save Using Sequential File Name	Ctrl+U
	Find Images	Ctrl+F
	Print	Ctrl+P
	Print Stack	
	Run Program	
	Exit

Loading Individual Images into a Stack File

- 2. To add individual images into a stack file
 - In the main menu, select Edit > Stack > Add
 Plane
 - Enable **Close image after adding** if you would like to close the individual image after adding it to the stack (image will not be deleted, just closed)
 - Click on the button below Source to select the desired image to be added to the stack (image must already be open)

NOTE It is suggested to add planes consecutively to match order of sites acquired, Time points acquired, or Z steps taken.

- Select where to add the new image in the image stack under the Resultant Stack section (current plane, top, bottom)
- Click on the Add button

Removing Individual Images from a Stack File

- 2. To remove individual images from a stack file
 - In the main menu, select Edit > Stack > Remove Plane
 - Enable **Keep image after removing** to copy the plane removed to a separate window
 - Select the desired image plane by either highlighting the plane number or entering the plane number.
 - Click on the **Remove** button

For research use only. Not for use in diagnostic procedures.
